

Lee Melugin Memoir

After four years in the US Navy (Aviation Electronics Technician), I attended the Indiana Institute of Technology where I received my EE degree. I was not at the top of my class, but not at the bottom either. I was the president of the Tech Glee Club, a 40 member all male group that performed at various college functions and other functions in Fort Wayne. I don't sing anymore. My singing voice retired a long time ago.

After graduation I was employed by several companies in Chicago, Orlando, Sarasota, and Fort Lauderdale. I finally found my home at Motorola as the International Marketing Manager in the MPU group, then moved over to the Technology Management Department to help negotiate and execute trade agreements with customers and other semiconductor companies. I am very fond of those great 22 years (1976 - 1998).

Next, I turned a hobby into the business of event videography. Joyce, my wife, and I taped weddings, and other special events using two cameras. Editing was performed on my 27 inch iMac with Final Cut Pro software. Those were good times. One of my favorites was recording the Christmas pageants and Spring variety shows performed by the Casner Christian Academy, a pre-school attended by three to six year old children. We produced a master disk for the school to make copies to sell to the parents.

Now, after "retiring" the videography business, we are enjoying leisure time. We have two grown and successful children, two grown and successful grandchildren, and now as of June 15, 2020 we have a great-grandson. Happy days

are still ahead.
