(At Motorola - June 1990- November 2011)

Nasr Ullah started off at RISC Applications Engineering in Motorola under Clara Serrano in 1990. He spent ~22 years at Motorola leading several MC88K and PowerPC Performance teams in the Networking and Systems Group and working on Mergers and Acquisitions in Freescale under Lynelle McKay in the GM's office. He ended his career at Motorola-Freescale with the Freescale-acquired Intoto Networking Software Company where he was in charge of World-Wide Ecosystem Solutions for the VortiQa Intrusion-Prevention/Intrusion-Detection software and Unified threat Management Hardware . Nasr left Motorola for Samsung Electronics in 2011, where he formed the Performance team for the Galaxy Phone series Exynos microprocessor Chips. He served as the Senior Director of Performance Architecture for Samsung Austin R&D Center till December 2019, when it got shut down by Samsung Korea HQ. He is now working as Senior Director of Performance Architecture for the up and coming RISC-V start-up SiFive.
